Addition and subtraction trios

A quick way to recall subtraction facts is to know your trios.

11

$4 + 7 = 11$

$11 - 4 = 7$

$7 + 4 = 11$

$11 - 7 = 4$

$8 + 9 = 17$

$17 - 9 = 8$

$9 + 8 = 17$

$17 - 8 = 9$

One-quarter of amounts

To find one-quarter of an amount:

- 1 Put it into **four** equal groups.
- 2 Count **one** of the groups.

What is one-quarter of 8?

- 1** Each set has been divided into four. Count one group to find how many are in one-quarter.

- 2** Divide each plate of bread into four equal groups. Count how many are in one-quarter.

$$\frac{1}{4} \text{ of } 8 =$$

$$\frac{1}{4} \text{ of } 20 =$$

$$\frac{1}{4} \text{ of } 16 =$$

$$\frac{1}{4} \text{ of } 12 =$$

$$\frac{1}{4} \text{ of } 4 =$$

- 3** Colour $\frac{1}{4}$ of each pattern. Make each pattern different.

$$\frac{1}{4} \text{ of } 12 = \square$$

Fractions of shapes

Look at the numbers at the bottom of each of these fractions. They tell you how many equal parts the shape is divided into.

$$\frac{1}{3}$$

Thirds: $\frac{1}{3}$ is one part.

$$\frac{1}{5}$$

Fifths: $\frac{1}{5}$ is one part.

$$\frac{1}{6}$$

Sixths: $\frac{1}{6}$ is one part.

- 1** What fractions are shown by each of these shapes?
Choose from the list of fractions.

- 3** Write the fraction of each flag coloured green.

Example

$\frac{1}{2}$

Try this

Design your own flag so that $\frac{1}{4}$ of it is red and $\frac{1}{2}$ of it is yellow.
What fraction of the flag is a different colour?

Fractions on a number track

Fractions are parts of a whole number.
They can be shown as a fraction wall.

1 Write the fraction shown on each number track.

- 2 Write the fractions in the correct part of this fraction wall.

$$\frac{1}{4} \quad \frac{1}{2} \quad \frac{1}{6} \quad \frac{1}{8} \quad \frac{1}{3}$$

Assessment

Draw and cut out six rectangles.

Fold each of them and colour one part to show the following fractions:

$$\frac{1}{2} \quad \frac{1}{3} \quad \frac{1}{4} \quad \frac{1}{5} \quad \frac{1}{6} \quad \frac{1}{8}$$

Unit 11 Time

O'clock

These two clocks both show 7 o'clock.

- The long minute hand is pointing to 12, so it is an **o'clock** time.
- The short hour hand is pointing to 7, so it is **7 o'clock**.

This is a **digital** clock.

- When you see :00 it is an **o'clock** time.
- The number in front is 7: so it is **7 o'clock**.

Try this

This is a typical day for Deema. Complete her diary entry.

Today I got up at ____ o'clock. I arrived at school at ____ o'clock.
After school at ____ o'clock I played with my friends.
I collected grandmother's eggs at ____ o'clock and then went home.
We ate at ____ o'clock.

Half past

These two clocks both show half past 7.

Notice that the hour hand has moved a little past 7.

The long minute hand is pointing to the 6 and is half-way round the clock.

- There are 60 minutes in an hour.
 - 30 minutes past an hour is half-way between the hours.
- So 7.30 is half past 7.

Days and months

There are the 7 days in 1 week:

Sunday	Monday	Tuesday	Wednesday	Thursday	Friday	Saturday
--------	--------	---------	-----------	----------	--------	----------

The week begins on Sunday.

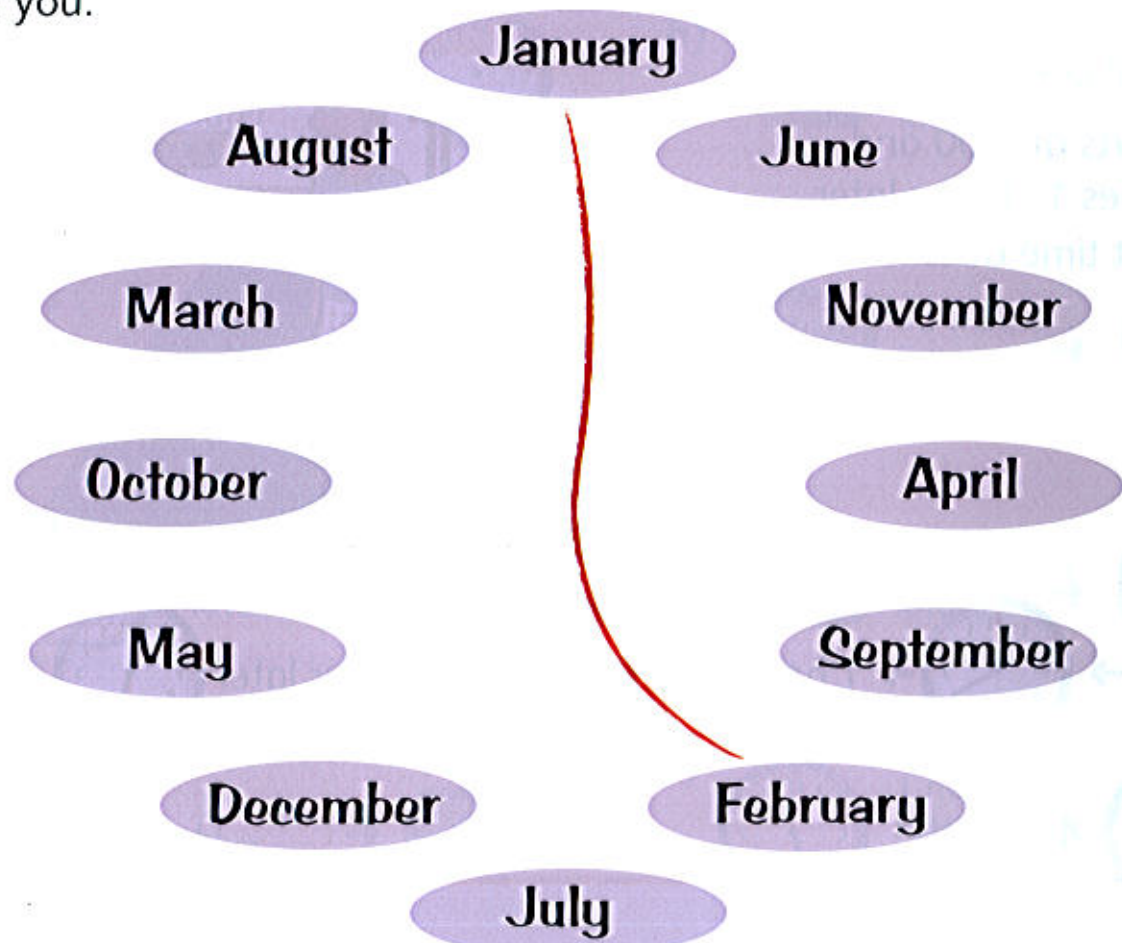

We use two calendars to show the months. For both there are 12 months in the year.

Gregorian calendar		Hijri calendar or Islamic calendar	
1	January	1	Muharram
2	February	2	Safar
3	March	3	Rabi' al-awwal
4	April	4	Rabi' al-thani
5	May	5	Jumada al-awwal
6	June	6	Jumada al-thani
7	July	7	Rajab
8	August	8	Sha'aban
9	September	9	Ramadan
10	October	10	Shawwal
11	November	11	Dhu al-Qi'dah
12	December	12	Dhu al-Hijjah

1 Write these months in the correct order.

- | | | | | |
|----|---------------|-----------------|----------------|-----------------|
| a) | June | August | July | May |
| b) | March | January | April | February |
| c) | November | October | September | December |

| e) | Safar | Muharram | Rabi' al-thani | Rabi' al-awwal |
| f) | Dhu al-Hijjah | Ramadan | Dhu al-Qi'dah | Shawwal |

- 2** Join these months of the year in order. The first two have been done for you.

- 3** This calendar shows one week in March. Look at the calendar to answer each question.

March						
Sunday	Monday	Tuesday	Wednesday	Thursday	Friday	Saturday

Macmillan Mathematics

A masterclass in Primary Mathematics

Macmillan Mathematics is a six-level Primary Mathematics course designed to meet the needs of international learners. The course bridges the gap between mainstream curriculum teaching and CLIL (Content and Language Integrated Learning) or English-medium teaching. It aims to introduce mathematics in a simple and interesting way, with clearly structured lessons and colourful and appealing artwork. Multi-leveled tasks help children apply what they've learnt to the real world.

Macmillan Mathematics caters for mixed ability classes and is designed to stimulate different types of mathematical thinking. 'Try This' boxes offer new challenges for fast finishers and provide more practice for other learners. Assess and review sections, in addition to the core teaching units, encourage further practice and consolidation of skills, and give teachers an effective way of evaluating their pupils' progress.

The course package for each level includes two Pupil's Books with an interactive Pupil's CD-ROM. The Teacher's Guide includes facsimiles of the Pupil's Book pages, answers to all the exercises, and supportive lesson notes to ensure that teachers get the most out of the course and their pupils.

Embark on a journey through the world of numbers, shapes and equations in Macmillan Mathematics, the Primary Mathematics course that counts.
